Edition 6 of 6

Ending the Year

And finishing strong!

Looking back on the year, it has been full of changes, transitions, and growth! We have successfully transitioned our students upon entry and exit back to home campuses. There have been over 6,000 skills mastered in IXL and 56 credits earned through credit recovery! Several students that have not been successful before passed their state assessments and many made marked improvements.

Our CHANGE residents created vision boards, setting goals, and discovering their personal values. It has been an enlightening experience as they think about the characteristics that impact their decisions and aspirations.

Faculty Escape Room: Lots of fun, but epic fail! Even teachers learn from mistakes.

Principal's Message

This has been a productive year at our school! As our students transition in and out, we have been consistent in our efforts to build positive relationships and academic supports that meet our students' needs. There has been evident improvement in reading and math performance over time, and I am proud of the accomplishments our teachers and students have made this year.

As I prepare to retire, I will be handing back the reigns to Dr. Stephanie House. I thank the Bell County Facility and Inspire Academies for the support and trust I have been given. It has been my ultimate privilege to work here!
