Psychological First Aid Training: Psychological First Aid (PFA) is an evidence-informed modular approach to help children, adolescents, adults, and families in the immediate aftermath of disaster and terrorism. Individuals affected by a disaster or traumatic incident, whether survivors, witnesses, or responders to such events, may struggle with or face new challenges following the event. PFA was developed by the National Child Traumatic Stress Network and the National Center for PTSD, with contributions from individuals involved in disaster research and response. This version for schools gives administrators and staff practical assistance to meet immediate needs and concerns, reduce distress, and foster adaptive coping in the wake of a disaster. **Members of each LEA School Safety and Security Committee are strongly encouraged to attend this training (see TEC 37.109).**
