

LEGACY RANCH

Middle school and high school students have been hard at work on a cool science project: making balloon-powered cars! They're gearing up to test them out and see whose car goes the farthest. Plus, they've been diving into books, paraphrasing chapters, and writing awesome book reports.

In history class, each student became a mini-expert on a U.S. President, sharing key facts in quick oral reports. And speaking of skills, students are mastering budgeting and making smart purchases for their future.

Getting active and healthy is also a big focus. Students are learning about heart rates and why exercise is important. They're even exploring healthy eating with the MyPlate website.

For Black History Month, elementary students honored historical black leaders with a special program they created and performed for everyone.

Now, they're getting their hands dirty in the springtime, learning about gardening and ways to keep bugs away while fertilizing the soil. 🌱🐛

Stay tuned for more updates as our students continue to shine bright! 🌈🌟
